

Press Release

VanEck launches new ETF for Uranium and Nuclear sector

- The VanEck Uranium and Nuclear Technologies UCITS ETF invests in companies from the uranium and nuclear energy sector
- Through the ETF, investors are able to invest in an industry that can make an important contribution to the shift towards a low-carbon energy supply

London, 8 February 2023 – Asset manager VanEck today listed the [VanEck Uranium and Nuclear Technologies UCITS ETF](#) on the London Stock Exchange. This new ETF (exchange-traded fund) allows investors to invest in companies that are active in the uranium and nuclear technologies and services sectors.

“Reducing carbon emissions is a task of global importance,” explains Martijn Rozemuller, CEO at VanEck Europe. “In this context, uranium has recently regained significant relevance as a low-carbon energy source. Also in view of recent geopolitical developments and the debate on the independence of the European energy supply, nuclear power as an energy source and uranium as a raw material are becoming increasingly important. The EU seems to recognise this and has recently included nuclear energy in the EU's climate taxonomy. In addition, researchers in the US achieved a breakthrough in nuclear fusion in December 2022, generating more energy than was consumed in the fusion process for the first time in history. This future technology, as well as new approaches such as liquid salt reactors, could make a very large contribution to our energy supply in the medium and long term.”

“France, Europe's leading nuclear energy producer, announced in 2022 that it plans to commission at least 14 new nuclear power plants by 2050 to renew its power grid,” adds Kamil Sudiyarov, Product Manager at VanEck. “The Dutch government has also announced plans to build two new reactors to make the country less dependent on fossil fuels.”

With a pure-play approach, the [ETF](#) aims in the future to invest only in shares of companies that generate the majority of their sales through uranium or nuclear energy infrastructure. These may include, but are not limited to, companies involved in the construction or maintenance of nuclear power facilities or that provide technologies and services to the nuclear power industry. Similarly, companies involved in the development and commercialisation of nuclear fusion, molten salt reactors and other emerging nuclear technologies may be included in the ETF. However, due to the lack of liquid pure-play companies in the nuclear energy segment, the ETF is currently also invested in companies whose sales of uranium and nuclear energy equipment account for less than 50 percent of total sales.

To this end, the *VanEck Uranium and Nuclear Technologies UCITS ETF* follows the MarketVector™ Global Uranium and Nuclear Energy Infrastructure Index. [The index](#) also allows the inclusion of listed funds that track the spot price of uranium or invest in physical uranium. The ETF excludes companies that have committed very serious violations of social norms, engage in the sale of controversial weapons or exceed certain sales thresholds in various critical sectors, including fossil fuels.

Equity market risk: The prices of securities in the fund are subject to the risks inherent in investing in the securities market, including general economic conditions and sudden and unpredictable price drops. An investment in the fund may result in losses.

Industry or sector concentration risk: The assets of the fund may be concentrated in one or more sectors or industries. The fund may be subject to the risk that political, economic or other conditions adversely affecting the relevant sectors or industries may adversely affect the performance of the fund to a greater extent than if the fund's assets were invested in a wider variety of sectors and industries.

ETF	VanEck Uranium and Nuclear Technologies UCITS ETF

About VanEck

VanEck has a history of looking beyond the financial markets to identify trends likely to create impactful investment opportunities. As of January 31, 2023, VanEck managed approximately 77 billion US dollars in assets, including mutual funds, ETFs, and institutional accounts.

With more than 100 ETFs globally, the asset manager offers a comprehensive portfolio covering numerous sectors, asset classes, and smart beta strategies. VanEck was one of the first asset managers to offer investors access to international markets. The objective has always been to identify new trends and asset classes – such as Gold Investments (1968), Emerging Markets (1993), and ETFs (2006), which have shaped the investment industry to this day.

VanEck is headquartered in New York City and has offices in Frankfurt (Germany), Pfäeffikon (Switzerland), Amsterdam (Netherlands), Sydney (Australia) and Shanghai (China).
